

Faces

File Folder Game

Directions for assembling the game

Materials needed: File folder, photocopy of game parts, coloring tools (colored pencils or markers, Crayons, pastels, etc.), scissors, glue stick, laminate (clear vinyl or contact paper are acceptable alternatives), pieces of sticky Velcro or tiny magnets, envelope or cardstock for pocket.

- 1 Choose two of the face options and photocopy the faces and all of the eye and mouth pieces.
- 2 Color each piece. Color the skin around the eyes and mouths with the same color used on the face.
- 3 Cut out the faces and each of the eye and mouth pieces. Keep the eye sets together.
- 4 Glue an envelope or edges of a piece of cardstock to the back of the file folder to create a pocket for the eye and mouth pieces to be stored. Glue a face to each side of the inside of the file folder.
- 5 Laminate the folder, eye and mouth pieces then cut them out, leaving enough laminate around the edges to form a seal. This will keep the objects better protected from moisture and wear.
- 6 Slit the envelope or cardstock open at one end just through the laminate to form a pocket to keep the eyes and mouths.
- 7 Attach Velcro pieces or tiny magnets onto the faces, eyes and mouth pieces so they will attach in the proper position.
