There are so many faces.

Lost in the crowd
Each one is searching
And

wants to be found
Every single person
Is

one of a kind
And we are His hands so we'll help those we can

One at a time
It's always one by one
One by one
There are

seven billion people who need His love
And the only way to help them and

lift them up
Is one by one
One by one

To measure 45
(Second time)
He knows His children Each one by name
And He sent us all to
break down our walls and walk in His ways
Live life wide open
Let people in No number too high We can
bless someone's life Again and again It's always one
There are different problems Different needs And everyone learns so
different ly So If we're going to change the world it will be
One by one One by one It's always
